

MATCHED CHAIN LENGTHS

MATCH & TAG

Each chain is matched and tagged to ensure the correct length difference. In order to benefit from the matched chain lengths and to prevent malfunction, please install the chains as described.

The tags fitted to the chains indicate in which position/order the chain should be installed:

- For A, B, C etc marked tags: all A tags one side, then all B tags and then all C tags, etc.
- Keep numerical order when installing the chain lengths: A1 opposite B1, opposite C1, followed by A2 opposite B2, etc.
- In case of multiple chain sets in one order, the chains marked 1A., 1B., 1C.. are part of one set. 2A., 2B., 2C.. are part of one set.
- Do not remove the tags until the complete chain lengths are fitted; once they are removed identification of chain length is not possible.
